

CORPORATE FACT SHEET

Press release

15 March 2005

Bangalore

Overview

XSYSYS Technologies Pvt. Ltd. is a 100% EOU (Export Oriented Unit) established under the STPI (Software Technology Parks of India) Scheme in Bangalore in 1996.

XSYSYS is a 100% daughter organization of DeDuCo nv, a leading provider of Customer Relationship Management Software Solutions for the Consumer Goods Industry in Western Europe.

Initially created as a captive unit of its parent company in Belgium, XSYSYS has evolved into an autonomous 3rd party IT Services provider.

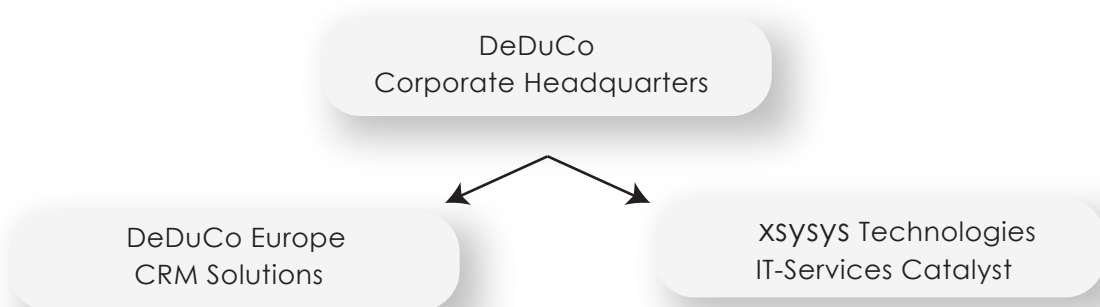

History - milestones

- established in 1996 as a captive unit of DeDuCo Belgium as DeDuCo Software Systems India Pvt.Ltd.
- 2001 : ISO 9001 certificate (KPMG)
- 2004 : new infrastructure work starts
- 2005 : renamed as XSYSYS Technologies - new mission - spin off from captive unit
Inauguration by HRH Prince Philippe of Belgium

Our mission

Our mission in this complex and increasingly competitive world is to help our clients regain and sustain competitive edge by leveraging on technology driven strategic solutions that we offer by building, integrating and maintaining world class infrastructural capabilities, processes and teams

Corporate structure

Our BELINDA partnership program

BELINDA is an IT-Services Gateway between Belgium and India

XSYSYS actively selects IT-Partners from India and Belgium in specific niche markets in order to help them deliver solutions in the local market abroad.

In other words, with the help of XSYSYS, Indian IT-Partners are able to bring their solutions to Belgium and Belgian IT-Partners are able to bring their solutions into the Indian market.

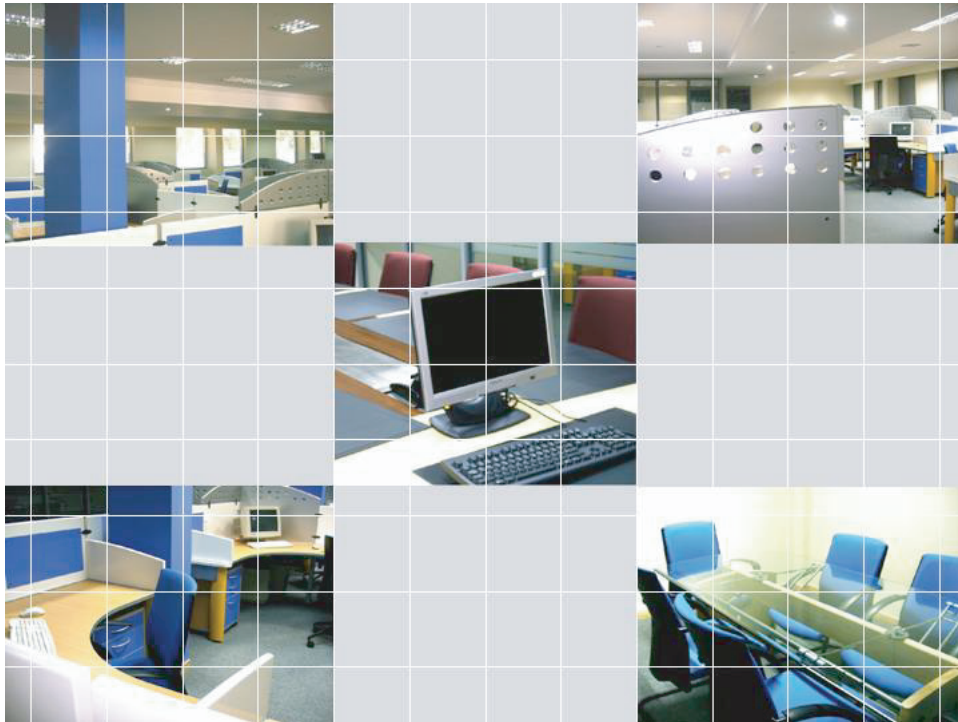

Our domain expertise

Proven strengths in specific domains, technology and process expertise is the foundation of our service offering. We have more than 8 years of experience in the offshore model and our robust management processes and automated metrics collection systems will ensure continuous improvement and so add value for the customer.

Our xsys domain experts will provide you with specific insights into the following matters thus helping you to realize your outsourcing strategy.

- the different options to start your organization's journey into outsourcing
- the factors you need to consider when deciding what functions can be outsourced offshore
- the criteria to consider when deciding upon an offshore service provider
- how to determine your readiness for offshore sourcing
- start-to-finish analysis for effective offshoring of business processes
